

Global Awards Reap

2008 has been a good year for UniMAP, especially considering the awards reaped in locally and internationally acclaimed design and innovation competitions. UniMAP had sent her representatives to three local and six international of such competitive venues. A 100% success was obtained in locales such as Switzerland, United States of America, Germany,

Belgium and South Korea, as is listed in the table below. Another point in fact is that most UniMAP's representatives to these locales were young researchers. This important fact coupled with the winnings that are testament to the design or innovativeness of the products, further consolidates the highest valued of UniMAP's assets – the researchers. Congratulations.

No.	Competition	No. Of Entry	Medals			Wining Percentage
			Gold	Silver	Bronze
