

Kencana Awarded RM74 Million Contract from ExxonMobil

Kencana HL Sdn Bhd has secured a RM74 million contract for the fabrication of Tapis R sub-structure for the Tapis Re-Development Project from ExxonMobil Exploration and Production Malaysia Inc. Under the contract, Kencana HL would undertake the procurement, fabrication, testing, load-out and tie-down of sub-structures which include jacket, piles and related components which form part of the Tapis R central processing platform for the project located off the coast of Terengganu. The one-off engineering, procurement and construction contract is expected to be delivered to ExxonMobil within the second quarter of 2013.
