DECLARATION OF THESIS

Author's full name : Nor Ashbahani Binti Mohamad Kajaan
Date of birth : 14 December 1986
Title : The Effect of Lamination Thickness of Transformer Core
on the Flux and Power Loss Distribution Using Grain-
Oriented 3.1% Silicon Iron
Academic Session : 2009-2012

I hereby declare that the thesis becomes the property of Universiti Malaysia Perlis (UniMAP) and to be placed at the library of UniMAP. This thesis is classified as:

CONFIDENTIAL (Contains confidential information under the Official Secret Act 1972)

RESTRICTED (Contains restricted information as specified by the organization where research was done)

OPEN ACCESS I agree that my thesis is to be made immediately available as hard copy or on-line open access (full text)

I, the author, give permission to the UniMAP to reproduce this thesis in whole or in part for the purpose of research or academic exchange only (except during a period of ___ years, if so requested above).

ACKNOWLEDGMENT

In The Name Of Allah, The Beneficent The Merciful

Alhamdulillah, finally I have finished my Master at UniMAP.

Firstly, thanks to the strength given by Allah, to undergo this master project that I have been working from last two years. Without God's favor, I do not think I can finish my project without much obstacles and made thing easy for me during the progress.

At this column, I would like to express my appreciation to my supervisor, Prof. Dr. Ismail Bin Daut who provided many valuable suggestion and constructive criticism that greatly influence to this project.

Also, I would like to thank Mr. Suhaimi Zakaria and also for the technicians for the continuous support and helps that have been provided throughout this project.

To the friends who has been very supportive and willing to give me a hand when needed, thank you so much. A lot of thanks also expressed to the lecturers and the staffs,

Electrical Energy & Industrial Electronic Systems, Universiti Malaysia Perlis
(UniMAP).

THESIS DECLARATION	i
ACKNOWLEDGEMENT	ii
TABLE OF CONTENTS	iv
LIST OF FIGURES	ix
LIST OF TABLES	xxiii
LIST OF ABBREVIATIONS	xxiv
LIST OF SYMBOLS	xxv
ABSTRAK	xxvii
ABSTRACT	xxviii
CHAPTER 1 INTRODUCTION	
1.1 Introduction to the Transformer	1
1.2 Problem Statement	2
1.3 Objective of the Research	2
1.4 Research Background	3
CHAPTER 2 MAGNETIC PROPERTIES, LOSSES AND FLUX DISTRIBUTIONS	
2.1 General Classes of Electrical Steels	5
2.2 Classes of Magnetic Materials	6

2.3	Introduction to Magnetic Properties of Ferromagnetic Materials	7
2.3.1	Magnetic Domains	7
2.3.2	The Magnetism and Magnetization Curve	11
2.3.3	Magnetostriction and Magnetostrictive Materials	15
2.3.4	Hysteresis Loop and Magnetic Properties	17
2.4	Losses in a Transformer	19
2.2.1	Hysteresis Loss	19
2.2.2	Eddy-Current Loss	20
2.2.3	Iron Loss	21
2.2.4	Power Losses under Rotational and Alternating Magnetization	22
2.2.5	No-load Losses	29
2.3	Magnetic Flux Distribution in Transformer Core	30
2.3.1	In-plane Flux Distribution	30
2.3.2	Normal Flux Distribution	31
2.3.3	The Effect of T-Joint to the Performance of Transformer Core	33
2.3.4	The Effect of Corner Joint to the Performance of Transformer Core	35
CHAPTER 3 FINITE ELEMENT METHOD SOFTWARE		
3.1	3D Three Phase Transformer Core Modelling	37
3.2	Three Phase Transformer Core FEM Analysis	38
3.2.1	Three Phase Transformer Core Drawing	38
3.2.2	Three Phase Transformer Core Simulation	39
CHAPTER 4 THE MEASUREMENT APPARATUS AND TECHNIQUE		
4.1	Main Apparatus	49
4.1.1	Actual Model Transformer	49

4.1.2	Core Material and the Geometry	51
4.1.3	Epstein Test Frame	52
4.1.4	Arrays of Search Coil	54
4.1.4.1	In-plane Search Coil	56
4.1.4.2	Normal Search Coil	58
4.1.5	The Thermistor	59
4.1.6	Power Analyzer	61
4.1.7	Multimeter	62
4.1.8	Three Phase Variable Voltage Regulator	63
4.1.9	Connection Board	63
4.1.10	Oscilloscope	64
4.2	The Software Technique	65
4.2.1	Matlab Software	65
CHAPTER 5 THE MEASUREMENT PROCEDURE		
5.1	List of Project Procedure	65
5.1.1	Calculation of the Primary Winding Line Voltage of the Transformer	68
5.1.2	Setting up the Transformer Frame	68
5.1.3	Arrangement of All Silicon Steel Plate at the Transformer Frame	69
5.1.4	Circuit Connection	69
5.1.5	Switching on the Three Phase Variable Voltage Regulator	70
5.1.6	Measuring and Recording the Value of Experimental Result	70
5.1.7	Adjusting the Voltage Regulator Step by Step	71
5.1.8	Finishing Data Recording and Switching Off the Power Supply	71
5.2	In-Plane and Normal Search Coil Procedure	71

5.3	Thermistor Testing Procedure	72
5.4	Description of the Calculated System	73
5.4.1	Calculation the Input Voltage for the Epstein Test Frame	73
5.4.2	Calculation the Input Voltage for the Transformer Core	74
5.1.3	Calculation for Building Factor	75
CHAPTER 6 RESULTS & DISCUSSIONS		
6.1	The FEM Simulation for Different Transformer Core Thickness	76
6.2	Nominal Loss and Power Loss of Different Transformer Core Thickness	79
6.3	Building Factor of Different Transformer Core Thickness	82
6.4	Flux Leakage of the Grain Oriented Silicon Iron Steel M4 with Different Thickness	83
6.5	3 rd and 5 th harmonic of the Grain Oriented Silicon Iron Steel M4 with Different Thickness.	84
6.6	Analysis the Flux of Different Transformer Core Thickness at the T-Joint for Different Grain Oriented Silicon Iron Steel M4 Thickness	86
6.6.1	The Flux of Localized Flux Density	86
6.6.2	The Flux of Localized Flux Density of 3 rd Harmonic	94
6.6.3	The Flux of Localized Flux Density of 5 th Harmonic	102
6.6.4	The Flux of Normal Flux Density	110
6.6.5	The Flux of Normal Flux Density of 3 rd Harmonic	118
6.6.6	The Flux of Normal Flux Density of 5 th Harmonic	126
6.7	Analysis the flux of Different Transformer Core Thickness at the Corner for Different Grain Oriented Silicon Iron Steel M4 Thickness.	134
6.7.1	The Flux of Localized Flux Density	134
6.7.2	The Flux of Localized Flux Density of 3 rd Harmonic	142
6.7.3	The Flux of Localized Flux Density of 5 th Harmonic	150

6.7.4	The Flux of Normal Flux Density	158
6.7.5	The Flux of Normal Flux Density of 3 rd Harmonic	166
6.7.6	The Flux of Normal Flux Density of 5 th Harmonic	174
6.8	The Localized Power Loss Using Thermistor Method	182
6.9	Flux Path and Flux Transfer Mechanism	197
6.10	Economical Aspects	201
CHAPTER 7 CONCLUSIONS		
7.1	Conclusion	203
7.2	Recommendation for Future Work	205
7.3	Commercialization Potential	206

6.89	The variations of localized flux density at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	138
6.90	The mesh graph of localized flux density at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	139
6.91	The variations of localized flux density at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	139
6.92	The mesh graph of localized flux density at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	140
6.93	The variations of localized flux density at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	140
6.94	The mesh graph of localized flux density at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	141
6.95	The variations of localized flux density at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	141
6.96	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	144

6.97	The variations of localized flux density of 3 rd harmonic corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	144
6.98	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	145
6.99	The variations of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	145
6.100	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	146
6.101	The variations of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	146
6.102	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	147
6.103	The variations of localized flux density of 3 rd harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	147
6.104	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	148
6.105	The variations of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	148
6.106	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	149
6.107	The variations of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	149
6.108	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	152
6.109	The variations of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	152
6.110	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	153
6.111	The variations of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	153
6.112	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	154
6.113	The variations of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	154

6.114	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	155
6.115	The variations of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	155
6.116	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	156
6.117	The variations of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	156
6.118	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	157
6.119	The variations of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	157
6.120	The mesh graph of localized flux density at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	160
6.121	The variations of localized flux density at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	160
6.122	The mesh graph of localized flux density at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	161
6.123	The variations of localized flux density at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	161
6.124	The mesh graph of localized flux density at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	162
6.125	The variations of localized flux density at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	162
6.126	The mesh graph of localized flux density at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	163
6.127	The variations of localized flux density at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	162
6.128	The mesh graph of localized flux density at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	164
6.129	The variations of localized flux density at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	164
6.130	The mesh graph of localized flux density at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	165

6.131	The variations of localized flux density at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	165
6.132	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	168
6.133	The variations of localized flux density of 3 rd harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	168
6.134	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	169
6.135	The variations of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	169
6.136	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	170
6.137	The variations of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	170
6.138	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	171
6.139	The variations of localized flux density of 3 rd harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	171
6.140	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	172
6.141	The variations of localized flux density of 3 rd harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	172
6.142	The mesh graph of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	173
6.143	The variations of localized flux density of 3 rd harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	173
6.144	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	176
6.145	The variations of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	176
6.146	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	177
6.147	The variations of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	177

6.148	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	178
6.149	The variations of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	178
6.150	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	179
6.151	The variations of localized flux density of 5 th harmonic at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.27mm thickness.	179
6.152	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	180
6.153	The variations of localized flux density of 5 th harmonic at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.27mm thickness.	180
6.154	The mesh graph of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	181
6.155	The variations of localized flux density of 5 th harmonic at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.27mm thickness.	181
6.156	The mesh graph of localized power loss at T-joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	183
6.157	The variations of localized power loss at T-joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	183
6.158	The mesh graph of localized power loss at T-joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	184
6.159	The variations of localized power loss at T-joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	184
6.160	The mesh graph of localized power loss at T-joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	185
6.161	The variations of localized power loss at T-joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	185
6.162	The mesh graph of localized power loss at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	186
6.163	The variations of localized power loss at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	186
6.164	The mesh graph of localized power loss at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	187

6.165	The variations of localized power loss at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	187
6.166	The mesh graph of localized power loss at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	188
6.167	The variations of localized power loss at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	188
6.168	The mesh graph of localized power loss at T-joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	190
6.169	The variations of localized power loss at T-joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	190
6.170	The mesh graph of localized power loss at T-joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	191
6.171	The variations of localized power loss at T-joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	191
6.172	The mesh graph of localized power loss at T-joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	192
6.173	The variations of localized power loss at T-joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	192
6.174	The mesh graph of localized power loss at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	193
6.175	The variations of localized power loss at corner joint during 1.0T for grain oriented silicon iron steel M4, 0.23mm thickness.	193
6.176	The mesh graph of localized power loss at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	194
6.177	The variations of localized power loss at corner joint during 1.5T for grain oriented silicon iron steel M4, 0.23mm thickness.	194
6.178	The mesh graph of localized power loss at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	195
6.179	The variations of localized power loss at corner joint during 1.8T for grain oriented silicon iron steel M4, 0.23mm thickness.	195
6.180	The transfer mechanism of flux between laminations at T-joint for grain oriented silicon iron steel, M4.	199
6.181	The transfer mechanism of flux between laminations at corner joint for grain oriented silicon iron steel, M4.	200

LIST OF TABLES

NO.		PAGE
2.1	Power loss at operation mode flux density for both butt and lap joint and mitred overlap joint.	36
6.1	The percentage reduced of nominal and power loss when using thinner steel plate, grain oriented silicon iron steel M4, 0.23mm thickness during 1.5T.	81
6.2	The percentage reduced of building factor when using thinner steel plate, grain oriented silicon iron steel M4, 0.23mm thickness during 1.5T.	83
6.3	The losses (RM) of several types of distribution transformer assembled with grain oriented silicon iron steel M4, 0.23mm thickness.	202
6.4	The losses (RM) of several types of distribution transformer assembled with grain oriented silicon iron steel M4, 0.27mm thickness.	202
6.5	Total saved (RM) when using thinner steel plate, grain oriented silicon iron steel M4, 0.23mm thickness.	202
