

MUCET 2006

The first Malaysia Technical Universities Conference on Engineering & Technology 2006 – MUCET 2006 was held on 19 and 20 December 2006 at KUiTTHO, Batu Pahat. This conference is a special platform for young researchers from the four recently established technical universities, namely KUKUM, KUiTTHO, KUTKM and KUKTEM, to share ideas and publish their research work, before they embark on publishing in international peer-reviewed journals.

This is in view of the inexperience of young researchers to publish in reputable peer reviewed international journals. However, MUCET is not a stop-gap measure but only a bridge towards promoting high quality research. KUKUM sent 28 researchers, who presented 29 papers, which was the largest researcher contingent attending the conference.
