Developmental Biology
An official journal of the Society for Developmental Biology

!!! Important information for NIH authors !!!

Reviewed Articles
Developmental Biology offers authors the option to sponsor non-subscriber access to their articles on Elsevier's electronic publishing platforms. For more information please view our Sponsored Article page.

Developmental Biology publishes original research on mechanisms of development, differentiation, and growth in animals and plants at the molecular, cellular, and genetic levels. Areas of particular emphasis include transcriptional control mechanisms, embryonic patterning, cell-cell interactions, growth factors and signal transduction, and regulatory hierarchies. Research Areas Include: ...

ScienceDirect

Books on ScienceDirect are available as:

eBooks/Monographs: A scholarly book or treatise on a single subject or a group of related subjects, usually written by one person or a group of contributing authors. It is a one-time, non-serial publication that is complete in itself. It may refer to a detailed, well-documented work on a specific subject or person

Book Series: A varied collection of reviews and essays on current research in a particular field or a comprehensive overview of a topic. The series are published regularly, at least once per year, and are highly cited and have a high usage per article. The series articles are similar to journals in content and structure, yet present a more lengthy examination of a subject area than is possible in a traditional journal article.

Handbooks: A collection of authoritative information in a mature research field, or a particular technique for ready reference. Designed to be easily consulted and provide quick answers and data in a certain area, chapters can serve as self-contained surveys, often defining a field. Manuals are included in this category.

ScienceDirect

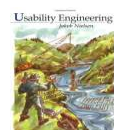

Books on ScienceDirect are available as:

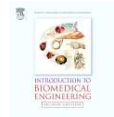

Major Reference Works: The distilled, established knowledge of a particular field, discipline or subject of interest. It can take the form of an encyclopedia, with short articles grouped within alphabetically arranged entries, or a comprehensive work, comprising longer entries arranged by subject association.

Reference Modules: Combine thousands of related Elsevier reference work articles into one evolutionary source of trustworthy information, now kept current. Articles are continuously reviewed by a renowned Editorial Board, and time-stamped as of the last review or update.

Legacy: This is a deep backlist scanning and digitization project bringing often unavailable books from the mid-20th century to the present to ScienceDirect

eTextbooks: Manual of instruction in any course or branch of study. It is a teaching tool which presents the subject matter defined by the curriculum.

Table of Contents	Book description
<p>Copyright, Page iv Show preview PDF (28 K) Recommended articles Related reference work articles</p>	<p>Book description</p> <p>How can society quickly convert to renewable energy? Can worldwide energy needs ever be met through 100% renewable sources? The answers to these questions rest largely on the perception of choice in the energy arena. It is of pivotal importance that engineers, researchers and policymakers understand what choices are available, and reasonable, when considering the design and deployment of new energy systems. The mission of this new book, written by one of the world's foremost experts in renewable power, is to arm these professionals with the tools and methodologies necessary to make smart choices when implementing renewable energy systems.</p> <p>Provides an introduction to the technical design of renewable energy systems</p> <p>Demonstrates effective methodologies for analyzing the feasibility and efficiency of large-scale renewable energy systems to help implementers avoid costly trial and error</p> <p>Contextualizes renewable energy design efforts by addressing the socio-political challenge of implementing the shift to renewables</p> <p>Free companion analysis software empowers energy professionals to crunch data for their own projects</p>

Search alerts

You currently have no Search Alerts defined. A Search Alert notifies you by e-mail when a stored search retrieves new results.

How to create a Search Alert:

- Define and run a Search.
- Save the search as a Search Alert.

* Search Alerts will be set to inactive if they are not used for an extended period of time. Click on Modify link to activate an inactive Search Alert.

If you are unsure of how to create a Search Alert, please try one of our pre-made Topic Alerts.

Topic alerts Add/Delete topic alerts

You currently have no Topic Alerts defined. A Topic Alert notifies you by e-mail when new articles pertaining to a specific topic are available on ScienceDirect.

Select the Topic Alerts in which you are interested.

Journal and book-series alerts

You currently have no Journal Alerts defined. A Journal Alert notifies you by e-mail when a new issue or new articles in press of a particular journal or a new volume of a particular book series or handbook series becomes available on ScienceDirect.

Select the journals and books you are interested in to begin receiving journal and book series Alerts.
