DESIGN OF ELECTRONIC COMPASS FOR QIBLA DETERMINATION

by

MOHD HAFFIZUL B. ZOHRI JARIR

Report submitted in partial fulfillment
of the requirements for the degree
of Bachelor of Engineering

JUNE 2011

ACKNOWLEDGEMENT

First of all, I would like to express profound gratitude to my supervisor, Mr. Shaiful Nizam Bin Mohyar, for his invaluable support, encouragement, supervision and stimulating suggestions throughout this project. Above all and the most needed, his moral support and continuous guidance enabled me to complete this project successfully.

Next, I am as ever deeply indebted to my Mother, Mrs. Jamaliah binti Daud for her love, support and understanding during my study. I would like to thank my brothers and sister for being supportive and caring siblings.

Collective and individual acknowledgements are also owed to my Faculty of Microelectronic Engineering for providing needed facilities during my research and my colleagues from electronic program whose help, support, interest and valuable hints in difficult times are somehow perpetually.

Finally, I would like to thank everybody who was important to the successful realization of this project, as well as expressing my apology that I could not mention personally one by one.

Once again, thank you very much.

APPROVAL AND DECLARATION SHEET

This project report titled Design of Electronic Compass for Qiblat Determination Application was prepared and submitted by Mohd Haffizul bin Zohri Jarir (Matrix Number: 081030469) and has been found satisfactory in terms of scope, quality and presentation as partial fulfilment of the requirement for the Bachelor of Engineering (Electronic Engineering) in Universiti Malaysia Perlis (UniMAP).

Checked and Approved by

(MR. SHAIFUL NIZAM BIN MOHYAR)
Project Supervisor

**School of Microelectronic Engineering
Universiti Malaysia Perlis
July 2010 - May 2011**

I hereby declare that all parts of this thesis are the result and analysis of my own research and work excepted for the sources in the references section.

MEMBINA KOMPAS ELEKTRONIK UNTUK PENENTU QIBLAT

ABSTRAK

Manusia pada hari ini gemar mengembara tetapi mereka perlu membawa pelbagai kelengkapan semasa pengembaraan termasuk kompas dan peta. Bagi pengembara Muslim, mereka perlu membawa bersama penunjuk arah Kiblat kerana mereka mesti menghadap ke arah Kiblat ketika menunaikan sembahyang lima waktu sehari semalam walau di mana pun mereka berada. Oleh itu, alat yang mudah dan efektif dari segi kos adalah menjadi satu keperluan bagi memudahkan para pengembara. Alat yang berasaskan kompas ini mengesan arah Utara Magnet menggunakan pengesan (HMC6352). Pergerakan pengesan daripada keluaran akan dihantar ke PIC16F876A.

DESIGN OF ELECTRONIC COMPASS FOR QIBLA DETERMINATION

ABSTRACT

People nowadays love to travel but they have to bring a lot of stuff during the travel including compass and maps. For Muslim travelers, they even have to bring Qibla pointer as they must be faced to Qibla while performing their five times prayer throughout the day and the night regardless of the location. Thus, there is a need for a simple and cost effective device to facilitate these travelers. This compass-based device finds the direction of Magnetic North through Sensor (HMC6352). Position Sensor from the output will be sent to PIC16F876A and is programmed using C language.
