MONEY BOX WITH SENSOR

SUMMARY OF INVENTION

Savings is difficult to be practiced by individual. All level of society especially children are most difficult to practice savings. By this innovations project, it can encourage the user to practice savings at least once in a day. This project have some other functions which is it can call the people to wake-up early in the morning. It is because the sensor will produced noisy sound.

Compare to the other money box in the market, this project is more efficient in such a way the sensor inside will alert the owner to feed it, hence make a saving everyday. Beside, catchy design may attract people mostly for children to own this money box.

In this project, we use the PIR sensor. This sensor is cheap and easy to use. For the body, we use ABS (Acrylonitrile Butadiene Styrene) plastics which is are more high impact strength, tough, hard and good chemical resistance. So that the money box can't be broke easily.

PROBLEM STATEMENT

- Mostly people from young age to the adult difficult to practice savings.

By observation, we can design money box with sensor. But some of it may be questioned.

ADVANTAGES

- Low cost
- Easy to use
- From this innovations project, we can practice savings every day to ensure the feature.
- We can make savings as the common habit every day.
- Can attract younger age to own this project.

NOVELTY OF INVENTION

This coin box with saving alert is first invented to encourage the savings habit in all level of society.

Part for entering the coin
