Koleksi Rujukan Kursus

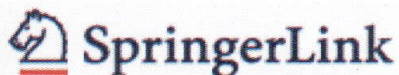

Koleksi ini telah dibangunkan pada bulan Disember 2006 atas permintaan pengguna Perpustakaan. Koleksi ini menempatkan buku-buku rujukan dan buku-buku teks bagi setiap semester. Buku-buku yang ditempatkan di dalam koleksi ini dikhususkan untuk kakitangan akademik UniMAP. Buku-buku di dalam koleksi ini telah dilekatkan 'redspot' pada tulang buku bagi membezakan kategorinya. Tempoh pinjaman bagi koleksi ini adalah seminggu dan denda yang dikenakan untuk pemulangan lewat ialah RM1.00 sehari.

Pangkalan Data Elektronik

Capaian maklumat 24 jam sehari, 7 hari seminggu dan 365 hari setahun tanpa istilah '**Perpustakaan DITUTUP**' menjadikan sumber rujukan elektronik begitu penting terutama di UniMAP yang merupakan kampus teragih.

Menyedari kepentingan sumber rujukan elektronik, Perpustakaan telah mengambil inisiatif untuk melanggan beberapa pangkalan data baru untuk ditambah setiap tahun.

Antara pangkalan data baru yang dilanggan pada tahun 2006 adalah :-

SpringerLink eJournal
SpringerLink eBook

Perisian Bibliografi **EndNote**
...Bibliographies Made Easy™

Penulisan bibliografi atau rujukan merupakan suatu perkara yang penting bagi setiap penulisan ilmiah. Penghasilan bibliografi mengambil masa kerana ia ditulis mengikut format tertentu. Justeru itu, bagi memudahkan warga UniMAP khususnya kakitangan akademik dan pelajar, Perpustakaan telah membeli perisian EndNote.

Reference Course Collections

This collection was started in December 2006 upon the request of users of the Library. The collection contains reference and text books used every semester. Books placed in this collection have been specially requested by academic staff. The books are labelled "redspot" on the outside rim for ease of visibility. The loan period for the books is one week, and a RM1 / day penalty is imposed for every late return.

Electronic Data Base

To acquire information 24 hours a day, 7 days a week and 365 days a year without having to use the sign "**Library CLOSED**" makes the source for electronic reference very useful and convenient, especially within UniMAP, which is a distributed campus. In addition, the Library also subscribes to several new databases every year.

Among the new databases subscribed for the year 2006 are:-

SpringerLink eJournal
SpringerLink eBook

Bibliographic Software **EndNote**
...Bibliographies Made Easy™

Bibliographic writing or reference is important for scientific writing. Bibliographic search takes time as it is written according to specific formats. Hence, to make it easier for members of the UniMAP community, especially for academic staff and students, the Library has bought the EndNote Software.
