

# Research Talk by Dr M.S Thakur from Central Food Technological Research Institute, Mysore, INDIA

**On August 29, 2008**, the Sensor Technology and Applications Cluster, in collaboration with the Institute of Nanotechnology Engineering, UniMAP, organized a research talk titled “Application of nano particles based biosensor system for food and environmental monitoring”. The talk was given by a prominent scientist, Dr. M.S Thakur from the Biosensor Group Fermentation Technology and Bioengineering of the Central Food Technological Research Institute, Mysore, India.

The talk revolved around the application of biosensor in the food and environmental industry. The visit by Dr. Thakur helped to realize the setting up of the ‘sensor group’ and facilitated cooperation between UniMAP and the Central Food Technological Research Institute, Mysore, India. Dr. Thakur was also taken on a tour of the Research Cluster and the Clean Room, Teaching Factory and Robotic Lab to see for himself sensor-related research activities at UniMAP.
