

Signing of MoU Between The Institution of Engineers, Malaysia (IEM) and The Malaysian Steam & Internal Combustion Engine Engineer Association (Msiea)

STANDING COMMITTEE ON CORPORATE AFFAIRS

IEM President Ir. Tan Yean Chin and MSIEA President Encik Mohd Hatta bin Ab Bakar at the signing of the MoU

The Institution of Engineers, Malaysia (IEM) and The Malaysian Steam & Internal Combustion Engine Engineer Association (MSIEA) signed a Memorandum of Understanding (MoU) on 6 February, 2017, for mutual collaboration and joint activities between both organisations.

Representing IEM was its President, Ir. Tan Yean Chin, and representing MSIEA was its President, Encik Mohd Hatta bin Ab Bakar.

Through the MoU, IEM and MSIEA have agreed to mutual collaboration and joint activities. By attending IEM activities, MSIEA engineers will be able to meet engineers from a similar industry and other industries so as to acquire knowledge and learn through the experience of others.

With a membership count of over 40,000, IEM is the largest such professional body in the country. President Ir. Tan Yean Chin encouraged members of MSIEA to join IEM. This way, MSIEA engineers will be able to attend IEM activities, which will enhance their professional development and career.

A non-profit professional organisation, MSIEA serves the needs of its members in the fields of boiler, diesel engine and gas turbine, provides education and training as well as organises forums for the exchange of ideas and information. It also represents the interests of steam engineers and internal combustion engineers.

Wherever possible, IEM will bridge the industries technical "gap" and promote the sharing of professional

knowledge and industry best practices via its various Technical Divisions, Training Centre and other related IEM international linkages, such as the ASEAN Federation of Engineering Organisations (AFEO) and Federation of Engineering Institutions of Asia & Pacific (FEIAP). ■
