# SATAY GRILL

## NOVELTY OF INVENTION

A satay grill is an innovation to burn a satay easily, environmentally friendly, save and clean.

## OBJECTIVE

- To develop a satay burner cleaning and easy
- To create new invention to burn the sate

## PROBLEM STATEMENT

- The current products of satay burner is used charcoal to burn the sate. The burner process makes a smoke and the dust of charcoal is dangerous and dirty.
- The burner process using the conventional satay burner is more tired because the human must fan the satay to make a ember that high temperature to burn the satay quickly.

## SUMMARY OF INVENTION

The Satay grill is an innovation developed by using the heating element. The electrical source is applied to supply a high temperature to burn the satay. The preparation of satay is put a satay on the grill where its located between the heating element. The temperature is controlled by thermostat

## ADVANTAGES

- Portable and easy to handling
- Minimum human energy
- Friendly environmental
- Safe and clean
