**ERCIAL POTENTIAL**

Common soap bars are a 19th century invention that was used in the textile industry and in the last 5000 years. Some snapshots in our lives make for a fascinating

Archaeological evidence of soap was found in clay containers dated at 2800 B.C. The containers state that the product was made from animal ashes. The product thus produced was used to wash the body; it might have been used in textile manufacture. The Egyptians refer to medicinal use of soap for skin sores suggest that both animal and vegetable oils were used with alkaline salts to make a substance for skin sores as well as washing. Some synthetic chemical substances.

## **PRODUCT DESCRIPTION**

Paper soap can be used everywhere for convenience and light. This paper soap is made using oil, olive oil and coconut oil are one of the natural sources. It is used because it is from natural sources and is safe when we use it. It contains natural based products or animal

rtury invention, but soap  
d medicinally for at least
