

# Bio Malaysia 2006

In the recent BioMalaysia 2006 - Conference & Exhibition, organized and sponsored by MOSTI and Biotech Malaysia, and held on 6 to 8 December 2006 at Kuala Lumpur Convention Centre, KUKUM sent 8 research outputs. Of these, two were specially chosen as part of the best research output. Both were exhibited in the achievement area, together with three other public universities as well as other government funded research institutions. The two achievements were the highest, in the category of any research institutions. KUKUM is extremely proud of these achievements and is honored to be ranked together with more established institutions.

The title of the winning research was "Fabrication and Properties of Cobalt Implant Composite - CIC" by Assoc. Prof. Dr. Shamshul Baharin Jamaludin, School Of Materials Engineering and "Bioremediation of Azo Dye by Microbes Immobilized of Spent Granular activated Carbon Under Batch Operation" by Dr. Soon - An Ong, School of Environmental Engineering.

It was also an honour to KUKUM when Prof. Dr. Mohd. Noor Ahmad was invited as speaker in this event. He delivered his speech titled "Automated Electronic Tongue for Herbals Quality Control" on the second day of this conference.
