

Rope Climbing Robot

Rope Climbing Robot is a game based on the military physical training. The Rope Climbing Robot is required to climb a 4.5 meter (177") rope in three minutes. This exercise is completed when the robot touched the dedicated round plate (CLIMB) at the end of the rope. Two teams (red and blue) will fight in each round. (Time to beat is 13 seconds for 2.5 metre. Record made by UPM team in MURoC 2010)
