MEDICAL FACILITIES DATABASE MANAGEMENT SYSTEM

By

MUHAMMAD FAIZAL BIN OSMAN

Report submitted in partial fulfillment of the requirements for the degree of Bachelor of Engineering

APRIL 2007
Acknowledgment

First of all I want express my grateful to our mighty god, Allah S.W.T., course giving me this strength and opportunity to complete my project. Also I want to thanks god because give me healthy mind and body to let me doing my job. Secondly, I want say thanks a lot to my parents, my father and my mother for giving me endless moral support and motivation to keep me on track to finish project till the end of this project. To my supervisor, thank you so much for keep supervising me, teach me the right thing to do if I’m wrong, giving me brilliant idea to support my project, show what I do wrong then help me solve the problem and a lot more that I failed to mention here. I also want to say thanks to the librarians to help me find the resource I need to do my project. I want to say thanks also to all my friends for keep supporting me to do this project till the end. Lastly but not least I want to say thanks to whoever had helped me before in this project that failed to mention here.
This project report titled Medical Facilities Database Management System and Superconductors was prepared and submitted by Muhammad Faizal Bin Osman (Matrix Number: 031020319) and has been found satisfactory in terms of scope, quality and presentation as partial fulfillment of the requirement for the Bachelor of Engineering (Computer Engineering) in University Malaysia Perlis (UNIMAP).

## CHAPTER 1 INTRODUCTION

1.1 Introduction  
1.2 Objective  
1.3 Scope of Project  
1.4 Project Outline

## CHAPTER 2 LITERATURE REVIEW

2.1 Database Management System  
  2.1.1 Background History  
  2.1.2 Overview of Database  
  2.1.3 Features and Abilities  
2.2 Medical Facilities  
  2.2.1 Basic Data Requirement from Patient  
2.3 Previous Database  
  2.3.1 Previous Medical Facility Database Management System  
  2.3.2 Advantages  
  2.3.3 Disadvantages
2.4 Microsoft Access
   2.4.1 Development 14
   2.4.2 Access and Use Information from Multiple Sources 16
   2.4.3 Depend on Access 2003 17
   2.4.4 Share Information with Confidence 18

CHAPTER 3 METHODOLOGY
3.1 Stage 1 Planning 19
   3.1.1 Flow chat of designing this project 19
   3.1.2 Overview 20
3.2 Stage 2 Implementation of Project 20
   3.2.1 Creating the system interface 20
   3.2.2 Creating system database 23
   3.2.3 Link database with system interface 25
3.3 Stage 3 Pseudo Code 27

CHAPTER 4 RESULT AND DISCUSSION
4.1 Result 29
4.2 Discussion 29

CHAPTER 5 CONCLUSION
5.1 Summary 31
5.2 Recommendation for future project 32

PENGURUSAN SISTEM PANGKALAN DATA KEMUDAHAN PERUBATAN

Abstrak

Abstract

Medical Facilities Database Management System is a project to manage the data of medical facilities such as hospital and clinic. This system will help to store and hasten the process of retrieving patient medical history and data. Not only patient data, this system also can store the information of staff, medicine stock and inventory stock data. This system also can help to minimize the area for filing patient data that was always used large space in medical facilities. Others, this system have security password to prevent data stolen or delete by any outsider and entrusted person. This system has the wide memory to safe large amount of data. This system size is depending on the computer’s hardisk. Example each data size is 100 kilobyte, for computer that is using 40 gigabyte hardisk, it cans safe almost 40000 data. This can prove that this system surely can store large amount of data. With this system, it will help the medical facilities to store and retrieve data without wasting time and faster than existed failing system.
