ABSTRACT

DESIGN AND ANALYSIS OF A VIDEO MOTION PREDICTOR

by Lai Yoong Yee

21st century has experienced a vast range of video application, from internet streaming to HDTV broadcasting. However, video data consumes a large amount of storage capacity and require high bandwidth to transfer wirelessly. Thus, these data need to be compressed. Motion estimation plays a vital role in compressing these video data efficiently to achieve low power and real-time application. This paper will discuss the design and analysis of motion estimation architectures implemented using UMHexagonS fast search algorithm. The results show that the architectures can perform motion prediction efficiently to achieve real-time performance.

## ABSTRAK

Abad ke-21 telah mengalami perbagai aplikasi video, dari internet streaming hingga penyiaran HDTV. Namun, data video mengambil sejumlah besar kapasitas simpanan dan memerlukan jalur lebar tinggi untuk memindahkan tanpa kabel. Dengan demikian, data ini perlu dikompreskan. Jangkaan pergerakan memainkan peranan penting dalam mampatan data video secara cekap untuk mencapai kuasa yang rendah dan aplikasi real-time. Thesis ini akan membincangkan tentang desain dan analisis anggaran gerak architecture diimplementasikan dengan menggunakan algoritma UHexagonS carian cepat. Keputusan kajian menunjukkan bahawa architecture yang ditampir boleh melakukan ramalan gerak dengan cekap untuk mencapai prestasi yang real-time.

<b>Abstract</b>	<b>ii</b>
<b>List of tables</b>	<b>vi</b>
<b>List of figures</b>	<b>vii</b>
<b>Declaration of Authorship</b>	<b>viii</b>
<b>Acknowledgement</b>	<b>ix</b>
<b>Nomenclature</b>	<b>x</b>
<b>Chapter 1 INTRODUCTION</b>	<b>11</b>
1.1 Background of Study .....	11
1.2 Problem Statement .....	13
1.3 Objectives .....	13
1.4 Scope of Works .....	13
<b>Chapter 2 LITERATURE REVIEW</b>	<b>14</b>
2.1 Introduction to H.264/MPEG-4 AVC .....	14
2.2 Introduction to Motion Estimation .....	16
2.3 Sum of Absolute Difference (SAD) .....	19
2.4 UMHexagonS Algorithm search.....	19
2.4.1. Introduction to UMHexagonS Algorithm .....	19
2.4.2. Architecture of UMHexagonS Algorithm search.....	20
2.5 Summary.....	21
<b>Chapter 3 METHODOLOGY</b>	<b>22</b>
3.1 Introduction .....	22
3.2 Motion Estimation.....	22
3.3 Unsymmetrical cross-shaped multi-level hexagonal grid search (UMHexagonS) ..	23
3.4 System Architecture .....	25
3.5 Evaluation.....	29

<b>Chapter 4</b>	<b>RESULTS AND DISCUSSION</b>	<b>32</b>
4.1	Overview .....	32
4.2	Encoding video format .....	32
4.3	Behavioural of Architecture .....	35
4.3.1	Behavioural of Memory Block .....	35
4.3.2	Behavioural of Buffer .....	36
4.3.3	Behavioural of Processing Element .....	37
4.3.4	Behavioural of Adder Tree .....	37
4.3.5	Behavioural of Comparator .....	38
4.3.6	Behavioural of Control Unit .....	39
4.4	Decoding Data to Image .....	41
4.5	Total Clock Cycle Used .....	42
4.5.1	Performance analysis on a search point .....	42
4.5.2	Performance analysis on search pattern .....	43
4.6	Output log file .....	44
<b>Chapter 5</b>	<b>CONCLUSION AND FUTURE WORK</b>	<b>45</b>
5.1.	Conclusion .....	45
5.2.	Future work .....	46

# Declaration of Authorship

I, LAI YOONG YEE, declare that the thesis entitled DESIGN AND ANALYSIS OF A VIDEO MOTION PREDICTOR and the work presented in the thesis are both my own, and have been generated by me as the result of my own original research. I confirm that:

- this work was done wholly or mainly while in candidature for a bachelor degree at this University;
- where any part of this thesis has previously been submitted for a degree or any other qualification at this University or any other institution, this has been clearly stated;
- where I have consulted the published work of others, this is always clearly attributed;
- where I have quoted from the work of others, the source is always given. With the exception of such quotations, this thesis is entirely my own work;
- I have acknowledged all main sources of help;
- where the thesis is based on work done by myself jointly with others, I have made clear exactly what was done by others and what I have contributed myself;

# Acknowledgement

First of all, I would like to express my sincere appreciation to my supervisor Dr. Asral Bahari Jambek, who provides me the opportunity to take part in this project. This project could not been accomplished without the splendid guidance from him. I am deeply indebted to Dr. Asral who doesn't hesitate and constant sharing his knowledge with me regarding the project, which I have learned much from him. Besides that, he has helped me in the necessary improvement to the project.

Next, my grateful thanks to my senior, Yew Mun, Wan who have sharing his comment and knowledge towards this project. He is having the project similar with mine, knowledge sharing from him ease the flow of the project.

I would like to thank to my University that having a sufficient resources library. The library provided some handy books which practiced my Verilog HDL and Perl Language knowledge.

Lastly, I would like to thank my friends who are having their own project as well. They have become my motivation and inspiration while I'm doing this project. Besides, they have advised me not procrastinate the project until the last minute. I would like to take this opportunity to wish my entire friend best of luck.
