

Workshop on Writing Articles for Publication in Refereed Journals

(26 November 2007, Dewan Kuliah Dragon 2 [DKD 2])

Recently, the office of the Deputy Vice Chancellor (Research and Innovation) had organized a workshop on writing articles for refereed/impact journals. Twenty young lecturers from 8 Schools including the Centre for Communication Skills and Entrepreneurship and the Institute of Engineering Mathematics who are in the process of getting their articles published in local or international journals were selected to attend the workshop.

The workshop began with a short briefing from Prof. Dr. Zul Azhar Zahid Jamal, Deputy Vice Chancellor (Research and Innovation) and was then followed by an introductory session on writing articles in English presented by Associate Professor Ahmad Nazri Abdullah. Associate Professor Dr. Prabakaran Poopalan then gave some useful tips on writing a good journal article. In the afternoon a hands-on session was carried out where participants were asked to exchange articles and to give feedbacks and comments on the articles assigned to them. The articles were then returned to the original writers to do the needful. The aim of this workshop was to encourage researchers in UniMAP to produce good articles that could be published in local or international high-impact journals.
